Page 1 of 1

C/W AD 71-09-07 R1, by replacement and pressure test of the exhaust manifold, no defects noted, next due @ 8999.0 T.T. (100 hours) Note: Above AD Inspection requirements extended from 50 to100 hours per AMOC when Knisley Welding P/N K1250860-203 installed. C/W AD 93-5-6, P/C/W on 8-1-2000 @ 7917.7 hours, next due @ 9917.7 T.T. (2000 hours).

C/W AD 84-26-02, by replacement of paper induction air filter, filter next due for replacement @ 9399.0 T.T. (500 hours).

C/W AD 2008-10-2, by inspection of alternate static air source selector valve, no defects noted.

C/W AD 11-10-09, by inspection of seat track and seat pins, next due @ 8999.0 (100 Hours) or 10-2012(12 months).

ELT checked as per FAR 91.207 and found to operate properly, R&R ELT Battery w/new battery, next due for replacement 10/2013. C/W Oxygen Cylinder Hydrostatic Test, next due Sep/2014 (3 years).

- Removed and replaced engine assembly and all accessories with overhauled engine and accessories (engine overhauled by RAM Aircraft, TSIO-520-R, S/N 278296-R, for details see engine log book). Note: Fuel injection system adjusted as per TCM SID97-3E.
- 2. Engine equipped with Slick P/N 6320 pressurized magnetos, for details see FAA Form 337 this date.
- 2. Repaired and painted engine baffling and replaced baffle seals as needed, repaired fuel drain lines, and heat shields etc. as needed.
- 3. Removed and replaced Throttle, Mixture and Propeller control cables with new cable assemblies.
- Removed and replaced complete exhaust system with new Knisley Welding modified exhaust system, as per STC Number SA5012NM, and SE5009NM, P/N 1250860MA, (Inc. P/N K1250860-203 heat exchanger) see FAA form 337 this date for details.
- 5. Removed and replaced all engine compartment fuel and oil hoses with new RAM Supplied hoses (Kit P/N 1449-4).
- 6. Removed and replaced all engine shock mounts with new mounts.
- 7. Removed and replaced main ship battery with new battery (Gill P/N G242).
- 8. Removed and replaced propeller governor with overhauled governor, P/N C290D4U/T2.
- 9. Removed and installed propeller after overhaul (Overhauled by Memphis Propeller Service).
- 10. Removed and replaced throttle position to gear warning switch cable with new cable.
- 11. Removed and replaced fuel strainer cable with new cable.
- 12. Removed and replaced engine to airframe ground strap with new strap.
- 13. Removed and replaced engine induction air filter assembly with new filter assembly (Note: AD 84-26-02 Applies).
- 14. Removed and replaced alternate air door magnetic latch with new latch assembly.
- 15. Removed and replaced vacuum pump with overhauled vacuum pump (overhauled by Holly Aero).
- 16. Removed and replaced all main and nose landing gear flexible hydraulic hoses with new hoses (supplied from Cessna).
- 17. Serviced landing gear, wheel bearings, fluid reservoirs, and checked fuel screen.
- 18. Removed and replaced LH and RH, aft nose gear door hinges and hinge pins with new hinges and pins.
- 19. Performed landing gear warning horn and safety switch operational test & found the warning horn & safety switch to operate properly.
- 20. Removed and replaced LH and RH brake linings with new linings and resealed RH and LH brake calipers and bled brake system.
- 21. Checked all control cable tensions and found within limits.
- 22. Removed and replaced nose tire and tube with new Goodyear Flight Custom III tire and new tube.
- 23. Removed and replaced LH and RH main tires and tubes with new Goodyear Flight Custom II tires and new tubes.
- 24. Removed and replaced oxygen cylinder with serviceable cylinder (P/N 176307-76, S/N K600765/54). Cylinder was re-certified (hydrostatic tested) by Shoreline Marine, dba Safetech, see W/O number XD11030 dated 9/16/2011 for details.
- 25. Removed and replaced pilot inboard and outboard and co-pilot inboard and outboard seat rails with new rails.
- 26. Removed and replaced LH and RH inner and outer cabin side windows and aft cabin window with new windows.

I certify that this Aircraft has be to the work accomplished			d found to be in airwort	hy condition with respe
and than			.",

TCM TSIO-520-R Engine S/N 278796-R

Above referenced engine overhauled to new parts limits per FAR 43.2(a)(1)(2) to conform w/TCM SM X-30575A. Applicable AD's and Service Bulletins C/W at this time. All gears cleaned, polished when required, inspected, magnafluxed, and no cracks found. Finish and dimensional limits within RAM Gear Inspection Specification No. 1818, Rev. K dated 2-08-2010. Above referenced engine modified per STC SE3630SW-D. Installed new TCM camshaft P/N 655384, S/N 60782. Installed lifters p/n 658088 int. p/n 658077 exh. AD 10-11-04 n/a to lifter p/n installed. AD 97-26-17 c/w per installation of new VAR crankshaft P/N 649134, S/N N10GA060 per TCM CSB96-8. Ultrasonic inspection per MSB96-10A, due at next overhaul or when crankshaft removed. AD 99-19-01 n/a per crankshaft date of manufacture I/A/W TCM MSB99-3C. AD 2000-23-21 N/A to crankshaft serial number/date of manufacture I/A/W TCM MSB00-5D. Engine assembled with new TCM heavy style crankcase P/N 656678, S/N R11AA090. Installed new TCM nickeled cylinders. Cylinder hold-down nuts replaced and torqued per Overhaul Manual Supplement. Installed new RAM/FAA/PMA fuel nozzles P/N 2562-14C. TCM Service Bulletin SB06-1A N/A per installation of RAM fuel nozzles. Installed new oil cooler P/N 8000545, S/N 1366257, Engine accessories exchanged for new or overhauled units with exception of vacuum pump which was not installed per this work order. New Slick pressurized magnetos p/n 6320 installed per STC SE4651SW-D and pressurized. Service Bulletin SB3-08A N/A to magneto serial numbers installed. AD 88-25-04 para (b) N/A to P/N 6320 but RAM recommends 100 hour or annual inspection of magnetos. MSB94-8D on magneto timing procedure c/w per timing to data plate TC degree requirements with TDC locator and protractor with pointer. Engine modified to TSIO-520-R per Continental Service Bulletin M-75-6 Rev. 1. Installed RAM/FAA/PMA rocker arms P/N 1842-3 and 1842-4. AD 98-01-08 N/A per installation of RAM/FAA/PMA rocker arms. AD 79-25-07 P/C/W per engine mount leg P/N 643935 installed. Category 1 thru 3 TCM Service Bulletin Compliance Listing in RAM Manual. Above referenced engine eligible for 1600 hr. TBO per TCM SIL98-9 Rev. A, Note 4. AD 96-12-22 N/A Cessna oil filter adapter not installed. Aluminum alloy engine parts were coated per RAM Specification No. 1142. Installed RAM-FAA-PMA rocker arm covers P/N 2766-1. Installed RAM-FAA-PMA rocker arm cover gaskets P/N 1387-1. Engine ground run on test stand per RAM specifications for 4 hours. Engine run-in with Phillips 20W-50 Type M mineral oil. See RAM Recommended Oil Grade Maintenance Tip MT-1 for recommended oils. Engine approved for return to service for the work performed. Engine preserved per Service Bulletin SIL99-1 temp, storage up to 90 days. Pertinent details on file under Project 10 5757.

- Removed and replaced engine assembly and all accessories with overhauled engine and accessories including turbo charger, turbo oil supply and return check valves, turbo controller, wastegate, alternator, starter, fuel injection system etc. (engine overhauled by RAM Aircraft, for details see engine log book entry dated May 27th, 2011).
- 2. Engine equipped with Slick P/N 6320 pressurized magnetos, for additional details see FAA Form 337 this date.
- 3. Repaired and painted engine baffling and replaced baffle seals as needed, repaired fuel drain lines, and heat shields etc. as needed.
- Removed and replaced complete exhaust system with new Knisley Welding modified exhaust system, as per STC Number SA5012NM, and SE5009NM, P/N 1250860MA, (Inc. P/N K1250860-203 heat exchanger) see FAA form 337 this date for details.
- 5. Removed and replaced all engine compartment fuel and oil hoses with new RAM Supplied hoses (Kit P/N 1449-4).
- 6. Removed and replaced all engine shock mounts with new mounts.
- 7. Removed and replaced propeller governor with overhauled governor, P/N C290D4U/T2.
- 8. Removed and replaced engine induction air filter assembly with new filter assembly (Note: AD 84-26-02 Applies).
- 9. Removed and replaced alternate air door magnetic latch with new latch assembly.
- 10. Removed and replaced vacuum pump with overhauled vacuum pump (overhauled by Holly Aero).
- 11. Engine was serviced and pre-oiled prior to initial start with Phillips 20W-50 Type "M" engine oil, engine fuel system was then adjusted as per TCM SID97-3E. Engine was then checked for oil, fuel and exhaust leaks, none noted. Engine operation normal at all power settings.

I certify that this Engine has been inspected in accordance with a 100 Hour Inspection and was determined to be in airworthy condition.

	User/Installer	Responsibilities				

All repaired or replaced GARMIN units have a 90-day warranty or the continuation of the original factory warranty from the original purchase date, whichever is longer.

It is important to understand that the existence of this Document alone does not automatically constitute authority to install the part/component/assembly.

Where the user installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority.

Where the user installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts parts/components/assemblies from the Airworthiness Authority of the country specified in block 1.

Statements in block 14 and 19 do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

United States of America

Department of Transportation—federal Aviation Administration

Supplemental Type Certificate

Number SA4111SW

This certificate, issued to

RAM Aircraft Corporation

P. O. Box 5219

Waco, Texas 76708

cortifies that the change in the type design for the following product with the limitations and conditions

therefor as specified hereon meets the airworthiness requirements of Part 3 of the Civil Air

Hazulatuns

Criginal Product - Type Certificate Number 3A21, A4CE

Make: Cessna

Model T210, T210G, T210H, T210J, T210K, T210L, T210M, T210N, TU206A, TU206B, TU206C, TU206D, TU206E, TU206F, TU206G, TP206A, TP206B, TP206C, TP206D,

TP206E

Description of Type Design Change:

Installation of Hartzell Model PHC-J3YF-1RF/F7663-2Q, or F7663D-2Q Propeller according to Drawing 21004, Revision E dated 6/3/85, or later FAA approved revision.

Limitations and Conditions

See Continuation Sheet, pages 2 and 3, of this STC.

This certificate and the supporting data which is the basis for approval shall remain in effect until surrendered, suspended, rowched, or a termination date is otherwise established by the Administrator of the Federal Aviation Administration.

Date of application :

March 20, 1980

Date reissued:

Tale of issuance :

April 10, 1980

9/3/81; 9/14/81;/10/7/81;

By direction of the Ministrator 8

Don P. Watson

(Signature) Manager, Aircraft Certification Division

Southwest Region

Any alteration of this certificate is punishable by a fine of not exceeding \$1,000, or imprisonment not exceeding 3 years, or both.

NOTICE

Weight and balance or operating limitation changes shall be entered in the appropriate aircraft record. An afteration must be compatible with all previous alterations to assure continued conformity with the applicable airworthiness requirements.

8. Description of Work Accomplished

(If more space is required, attach additional sheets. Identify with aircraft nationality and registration mark and date work completed.)

certifies that the change in the type design for the following product with the limitations and conditions

therefor as specified hereon meets the acrowthiness requirements of Part 3 of the Civil Air

effective May 15, 1956, and Paragraph 3.112 as amended October 1, 1959.

Priginal Product - Type Certificate Number: 3A21

> Make Cessna

Model 210G, T210G, 210H, T210H, 210J, T210J, 210N, T210N, T210N, T210N, T210N, T210N,

Description of Type Design Change:

Installation of leading edge cuffs, droop tips, aileron gap seals, and stall fences, per STOL-Craft Drawing List No. 3 with FAA approval date of November 8, 1973, or later; and Draving List No. 3 with an FAA approval date of April 30, 1986, for 270L, T210L, 210M, T210M, 210N and T210N modified by STC SA760NW; and Drawing List No. 3 with an FAA (See Continuation Sheet)

Limitations and Conditions: 1. Airplane Flight Manual Supplement dated April 25, 1980, is required for 210N/T210N airplanes, Serial Number 21062955 and up, and Airplane Flight Manual Supplement dated April 20, 1982, is required for P210N airplanes, Serial Number P21000151 and up when this modification is installed.

2. Airplane Flight Manual Supplement dated April 25, 1980, revised to October 5, 1988, is required equipment for 210/T210 airplanes

(See Continuation Sheet) This certificate and the supporting data which is the basis for approval shall remain in effect until sur-

sendered, suspended, revoked, or a termination date is otherwise established by the Administrator of the

Federal Aviation Administration

Date of application:

October 23, 1973

Date reisered

May 25, 1977

Date of issuance :

PA . F 0110 0/10 400

October 23, 1973

Late amended:

Any alteration of this certificate is punishable by a fine of not exceeding \$1,000, or imprisonment not exceeding 3 years, or both.

This certificate may be transferred in accordance with FAR 21.47.

Department of Transportation—Acderal Aviation Administration

Supplemental Type Certificate

(Continuation Sheet)

Number SA966CE

Description of Type Design Change, Continued:

approval date of October 6, 1988, for 210N, T210N and P210N is required for installation of de-icer boots over the leading edge cuffs.

Limitations and Conditions, Continued:

- 2. (Continued) previously equipped with de-icer boots.
- 3. Airplane Flight Manual Supplement dated April 20, 1982, revised to October 4, 1988, is required equipment for P210N airplanes previously equipped with de-icer boots.
- 4. 210N, P210N, and T210N airplanes are eligible for installation of de-icer boots over the leading edge cuffs providing the airplane has the factory installed provisions for de-icing.
- 5. T210N airplanes previously modified by STC SA760NW are eligible for this modification.
- 6. 210K, T210K, 210L, T210L, 210M and T210M airplanes previously modified by STC SA1202CE are eligible for this modification.
- 7. This approval should not be extended to other specific airplanes of these models on which other previously approved modifications are incorporated, unless it is determined that the interrelationship between this change and any of those other previously approved modifications will introduce no adverse effect upon the airworthiness of those airplanes.

MAJOR REPAIR AND ALTERATION (Airframe, Powerplant, Propeller, or Appliance)
